Engineer with civil engineering and construction experience, and a full-stack data and analytics skill set. Data-driven work in staff training, operations, and quality assurance. A hands-on problem-solver who builds systems, writes clear procedures, listens thoroughly to stakeholders, and leads teams by setting a patient example.

EXPERIENCE

Founder & Director — Everything Is Learning, Inc. — Nairobi, Kenya (2023–present) (el.africa)

- Founded and self-funded (\$130K+) an innovative early-childhood organization. Managed daily operations, budgeting, and a team of 21 staff across two sites. Transitioned the project to local management, continuing to lead it remotely in my spare time.
- Authored a comprehensive training manual and standardized operating procedures, then trained staff to consistent quality standards.
- Built kenyaccounting (github.com/bhrdj/kenyaccounting), an open-source Python payroll system, to automate payroll.
- Partnered with Mount Kenya University on a formal evaluation study (n=50); managed research licensing and regulatory compliance.

Data Scientist / Consultant — Viebeg Technologies — Rwanda / remote (Jun 2022–May 2023)

- Health-tech firm supplying data-driven medical-supply procurement to 500+ hospitals across Rwanda, Kenya, and DRC.
- Identified and resolved product-ID fragmentation across three data silos by leading a physical warehouse reconciliation — aligning physical inventory to system records.
- Consolidated financial records for investor reporting and designed an ROI estimation model for hospital equipment purchases.
- Led the data/ICT workstream for Johnson & Johnson due diligence; deal closed as a 50% investment by J&J Impact Ventures.
- Recruited, built a technical interview for, hired, and trained a local successor to take over the role.

Full-time Parent — North Dakota (2015–2020)

- Career pause for family; piloted structured early-learning programs with measurable results.

Field Engineer — Skanska USA Civil — New York, NY (2009–2010)

- Jobsite coordination, quality inspections, and specification compliance on the East Side Access railroad-tunnel project, one of the largest infrastructure programs in the U.S.

Highway Designer — Missouri Department of Transportation — Missouri (2006–2007)

- Executed geometric roadway design and hydraulic stormwater design for a 4-lane rural highway project, working to engineering standards and specifications.

EDUCATION

Data Science Bootcamp — General Assembly (2022)

M.A. Economic Policy — Boston University (2013)

M.S. Construction Engineering — Missouri S&T (2010)

B.S. General Engineering — Swarthmore College (2006)

SKILLS

Technical: Python, Git, SQL, Statistics, Data Analytics, Linux/GitBash CLI, AI Process Automation

Domain: Civil & Construction Engineering, Field Engineering & Inspection, Continuous Process Improvement, Process Automation, Economic Analysis

Languages: English (native); Mandarin Chinese (~HSK 5); Spanish & French (proficient); Lao & Kiswahili (conversant)

AVAILABILITY

U.S. citizen with family in Laconia, NH year-round. Open to relocating anywhere in New Hampshire. Available to start promptly.
